First released in 2014, this book examines the events of 4th June 1993, when a young Australian spin bowler by the name of Shane Warne strolled up to the wicket and bowled a ball - his first delivery in an Ashes test match - to England's

old master, Mike Gatting. The ball became cricket's defining moment - the Ball of the Century - and in the space of a few dramatic seconds the face of the sport changed forever. Three matches later, Gatting was dropped and Warne went on to become arguably the most influential cricketer in the history of the game. Here we study Warne's early development, from his rookie days at the Australian Cricket Academy and Accrington Cricket Club, right through to his first Ashes match at Old Trafford in 1993. We also examine the science behind Warne's iconic delivery to Gatting, and try to explain why the ball behaved the way it did. Many commentators in the years since have claimed that Warne's 'Gatting Ball' changed everything, and because of it the art of spin bowling has been reborn. Regrettably this is not the case, and this book examines the reasons why. Warne tragically passed away in March 2022, but this book is presented as a tribute to a living legend, rather than as an elegy to one who has tragically passed.
