Unlike traditional eyelash curlers that only provide a temporary curl, Lash Lift Perming gives you a semi-permanent solution that requires minimal maintenance. The result? Fabulous lashes that require no mascara or curling.

The Science Behind Lash Lift Perming

Now that you know what Lash Lift Perming is, let's delve a little deeper into the science behind it. The key to achieving the desired lift lies in the application of a specially formulated perming solution. This solution gently breaks down the bonds of the lash hairs, allowing them to be reshaped and curled.

After the lashes are permed, a setting solution is applied to lock in the curl. This step ensures that your newly lifted lashes stay in place for an extended period. The entire process takes approximately 45 to 60 minutes, depending on the length and density of your lashes.
