There are few countries in the southern reaches of Africa as off-the-beaten-track as little Lesotho. Why? Well, for starters, it's Landlocked and entirely encompassed by the popular lands of South Africa the country, meaning it's not exactly the easiest place to get to. And then there's its veneer, spiked for the most part by impenetrable mountains of stark rock and sweeping plateaus of dusty sandstone – not the easiest place to navigate! But with Lesotho's difficulties so too come its beauties. The backcountry is wild and primeval. Sweeping grass plains are broken only by the occasional peppering of thatched San villages. The great mountain rivers are only just being tamed by even greater mountain dams. There are awesome waterfalls or valley panoramas around every corner, and the trekking – well, the trekking is simply to-die-for! Since this guide has been specially prepared to provide you with all the useful information you will need with an economical, well studied and profitable route to save time and money. Do not forget to put this guide in your travel luggage and take it with you to Lesotho.
