Thanks, for showing interest in this book.

Your first question would be whether the genius can be produced because it is generally believed that a genius is born. The point is very valid and has been explained very well in this book. Besides, this book explains all the factors required to bring out the best in any individual.

Generally, nobody wants to get bogged down in theoretical aspects relating to such subjects. Hence, this book is designed in a very different and original way. The complex subjects have been simplified. The cartoons in this book convey much more than the words. The whole book itself is a mnemonic. Once you read it, you will memorize it and the theory which is memorized and well-understood can be implemented easily.

My best wishes.
