Future perspectives

- ➤There is still much that needs to be determined about IL-35 biology and the role of the IL-12 family cytokines in general.
- 1- Can IL-35 inhibit other T-cell (Th1, Th2, Th17, CD8 T cell, etc.) and non-T-cell (DCs, macrophages, NK cells, neutrophils, etc.)?
- 2- The composition of the IL-35 receptor and the signaling cascade it initiates and the expression pattern of this receptor is still unclear.
- 3- Do the other cell types produce biologically active IL-35?
- 4-Many of the current knockout mice in fact lack production of two cytokines, new mutant mouse models are clearly required.
