WONDER (UNKNOWN SCIENCE)

SCIENCE-QUARY

This book, contains some of the most important physics wonders the shortcomings? Questions to update. Obtained new-updated formulas are obviously incomplete and to examine, add, correct it will be.

Again this book with questions I wonder ?, science has not examined conditions were also produced by addressing the issues. Example, Great Information is given before the explosion and the Big-Bang mathematical proof. This new solutions pioneered for the study of science.

Again, our book, at least high school education information from our readers demand.

Young scientist interested in theoretical physics of the book, it is hoped to be a guide for our candidates.

In addition to the end of the book, the author's young science candidates a written conference was presented.

“I don’t believe that God rolls dice”. ALBERT EINSTEIN - Physicist – 20th century

“God rolls dice. He rolls some too far away. We can’t see”. STEPHEN HAWKING  
- Physicist – 21st century

“God rolls countless dice. Also, right in front of us and all are double-sixes. We see then all right but, we are having difficulty in conceiving”. A.AYHAN  
SAATCIOGLU – Engineer – 21st century

Dear Readers,

This booklet is approximately 140 pages. As you may appreciate, the scientific backsliding of the Big-Bang could have been just a few volumes of proof. The first book of Albert Einstein, The Theory of Relativity, published in Say Publishing in Turkish, has a total of 140 pages. Also in this book; there is no resources section! There are only appendices and these appendices describe Lorentz Formulas. Note that there is no resources section in my book either. You know the easiest and smartest thing in the World is to give advice.

This book includes -IX- chapters:

Chapter-I- Einstein's formula  $E=mc^2$  full is it correct? If not, whats truth?

Chapter-II- Energy Saving Principle full is it correct? If not, whats truth?

Chapter-III- Ozone hole of people is it false? What is right?

Chapter-IV- Dinosaurs death science knows wrong?

Chapter-V- New protect on remedies from AIS.

Chapter-VI- Do fingerprints change?

Chapter-VII- Science Big-Bang is wrong knows? Which one is correct?

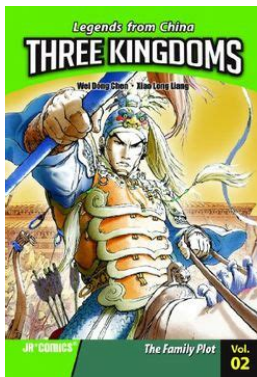

Chapter-VIII- What is death?

Chapter-IX- Is the earthquakes-solar eclipse relationship exact?

At the end of my book, I gave a written lecture to our young generation of science lovers! Forgive me!
